To install Citrix on your iPad/iPhone/iPod Touch

Go to the Appstore and search for Citrix Receiver

After you have installed the Citrix Receiver open the app
Click on Add Account, and add the following information. The address is https://wyomwy.cernerworks.com/prod then click Next.

When you receive an error that the server could not be identified, click on Manual Setup.
All you will need to do here is to put in a description and click save.

Click on the person in the top right corner. This will bring up the accounts. Click on the account you made.
You will get this website. Click in the username box and type in your user name. Click Next and type in your password.

Choose the application you would like to run.
You will need to click on the down arrow on the top of the page to get to the keyboard.

Enter your username and password.

You will be placed in your default home screen. If you need to type anything in you will need to click the down arrow to select the keyboard. To exit click the Exit icon. This will place you back to the screen with all the applications.
